

Advantages of the 3400 Family

- “Pull” Type reduces stress in the body under load for more accurate clamping, provides greater strength while reducing weight and reduces stationary jaw deflection by 80%
- One piece body design vs. PT400A two piece body design
- Full 6” opening with jaw plates in standard position
 - (PT400A has only 4”)
- Can be mounted upright (3400V) or on either side
- Matched stationary jaw to keyway including body height ± 0.001 ”
- 0.0005” clamping repeatability
- Foot print less than 13”
- Available in hydraulic and reverse models
- Hydraulic units have $\frac{1}{4}$ ” stroke
- Groove Lock® jaw and workstop included
- 3400V is 22% less cost than PT400A
- Lightweight
 - 3400V = 28 lbs
 - 3400H = 31 lbs
